SUMMARY

With two years of experience as a Machine Learning Engineer at multiple startups, I have authored technical blogs and tutorials guiding developers on building AI-powered agents across domains such as sports, healthcare, video editing, and retail using Devtools

SKILLS

- Large Language Models: ChatGPT, Gemini, LLaMA 3, Claude, Mistral etc.
 - Open source models: SAM 3, YOLO26, Florence 2, Whisper, TortoiseTTS, Qwen3-VL etc.
 - Python packages: PyMuPDF, Camelot, Selenium etc.
 - Cloud & DevOps: AWS (EC2, S3 Bucket), MLOps, LLMops, vLLM.
 - Web Development: Django, Spring Boot, FastAPI (Backend); React (Frontend)
 - Programming Languages: Python, Java, TypeScript, etc.
 - Technical content writing for Devtools.
-

WORK EXPERIENCE • [LinkedIn](#)

ML Blog Contributor • Remote • Freelance @ [Roboflow](#) (YC S20) **JUL 2025 - Present**

- Built an AI-Powered [Shelf Price Verification workflow](#) that automatically validates the shelf labels.
- Built a computer vision system to [automatically recognize marathon bib numbers](#) and record finish times.
- [Automated Image Background Blurring](#) Using SAM 2
- Developed an [Invoice Analysis AI agent](#) for Detecting Price Markups.

AI Developer Relations Engineer • Remote @ [Sieve](#) (YC W22) **Dec 2024 - Apr 2025**

- Developed an [AI-powered video background removal and captioning pipeline](#).
- Created an [AI powered gameplay reaction pipeline](#) that takes a gameplay video and adds commentary based on a chosen celebrity.
- Built a [sports ball-tracking system](#) leveraging SAM 2 with practical solutions for handling scene changes, false positives, and dynamic camera movements.
- OSS contribution - Tutorial for [Remotion](#) framework.

Full Stack Developer, Personal Projects

- [Screenshot Editor](#) – Web-based tool for annotating and editing screenshots, particularly useful for developer advocates, technical writers, educators, and anyone who needs to create clear, shareable visual content.

Data Engineer • Remote @ [Unisala](#) **Jul 2023 - Dec 2023**

- Developed a universal web scraping script powered by LLMs to extract scholarship data from university websites, regardless of their HTML structure.
- Built a custom ChatGPT assistant using LangChain and vector databases for querying personal documents.
